Annual Digest 2000-2001

Introduction

This is the ninth Annual Digest produced by the SCORE (Scottish COntinuous REcording) System. Between April 2000 and March 2001, details of just over 16,200 lets made by housing associations in Scotland were recorded. In addition, just under 330 shared ownership sales were recorded by SCORE – this information is presented in Section 4 of the Digest.

The information in this Digest is presented on the basis of 12 sub-divisions of the 5 Scottish Homes Regions, which were created in April 1997.

The Scottish Federation of Housing Associations has been responsible for the management of SCORE, since the project's inception in April 1997. Our thanks are due to Scottish Homes for the funding support which enables the project to continue and flourish. We also wish to thank the Joint Centre for Scottish Housing Research, who undertake the data collection, preparation and analysis on our behalf.

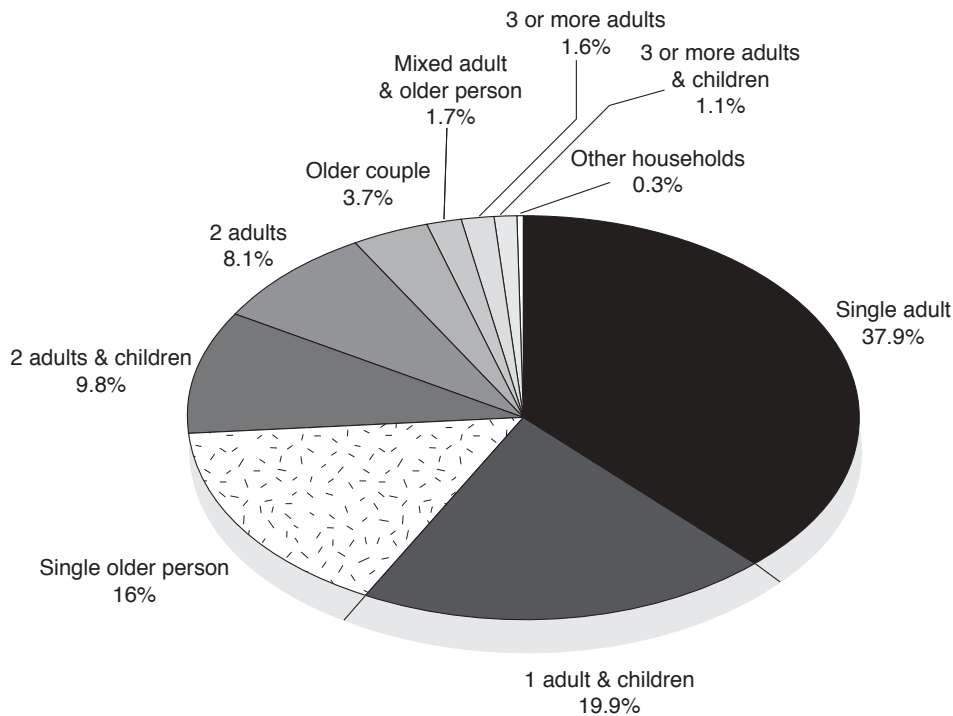

CONTENTS

	Introduction	ii

4	Shared Ownership Sales	
	4.1 Who was housed?	13
	4.2 Who was working?	13
	4.3 What ethnic groups were housed?	14
	4.4 What were the purchasers' previous living circumstances?	14
	4.5 Why did households make a shared ownership purchase?	14
	4.6 Were purchasers previously on a waiting list for rented housing?	15
	4.7 How did purchasers hear about shared ownership?	15
	4.8 How many purchasers were first-time buyers?	16
	4.9 How many purchasers needed a mortgage?	16
	4.10 What sizes of tranche were bought?	16
	4.11 What types and sizes of property were bought?	16
	4.12 What was the market value of the properties bought?	17
	4.13 Income of purchasers	18
	4.14 Rents by Area and Tranche (25% and 50% purchasers)	18
	4.15 Total weekly housing costs (for people paying rent and mortgage)	18
	4.16 How long were properties vacant?	19
	4.17 Shared Ownership sales by Area	19
5	Tables	20 - 28

1. The Tenants

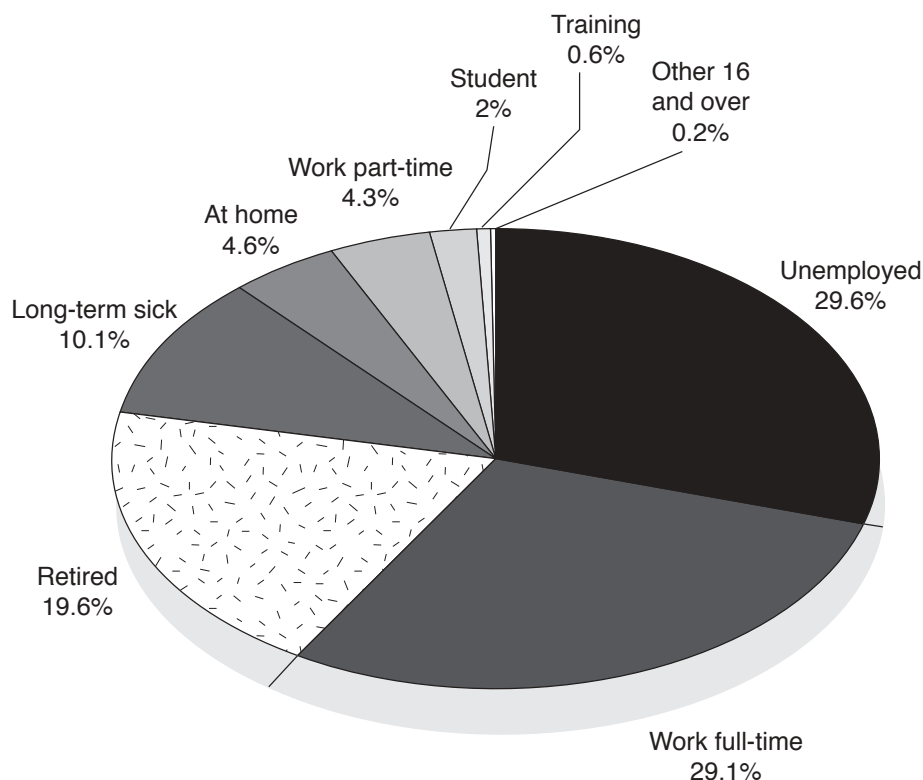

1.1 Who was housed?

(see Table 1.1)

- The proportion of lets to dual-parent families has seen the greatest change since last year, with a fall in lets of 1.2%, down from 11% to 9.8%. Lets to lone parents have also decreased slightly, down from 20% to 19.9%. Lets to households with 3 or more adults and children have fallen from 1.3% to 1.1%, resulting in an overall decrease in lets to households with children of 1.5%.
- Geographically, the fall in lets to dual-parent families is greatest in Grampian – also the area where the lowest proportion of lets is made to this household type - down 2.2% from 8.1% last year to 5.9% this year. Highlands & Islands area, by contrast, continues to house the largest proportion of dual-parent families and in fact increased the proportion of lets made to such households from 14.4% last year to 15.4% this year.
- By contrast lets to childless adult households (not including older people) have increased since last year. Single adult households have increased from 37.4% to 37.9%, and households with two or more adults now take up 9.7% of total lets, as compared to 9% last year.
- Changes in the proportion of lets made to single adults showed some significant geographical variation, falling by 3.8% in Forth Valley but rising by 5.2% in Ayrshire, Dumfries & Galloway. Grampian area now makes almost half of all lets to single adult households (49.1%).

1.2 **Who was working?**
(see Table 1.2)

- The proportion of households in work rose from 32% last year to 33.4% this year. This total rise was due to the increasing number of households in full-time work, up to 29.1% this year from 27% last year. The proportion of households in part-time work, however, fell from 5% last year to 4.3% this year.
- The number of unemployed households fell by 0.9%, down from 30.5% last year to 29.6% this year. The number of households classed as either retired or ‘at home’ also fell slightly.
- A number of areas experienced large rises in the number of lets going to full-time working households: Ayrshire, Dumfries & Galloway saw a rise of 5%; The Borders a rise of 5.5%, and Fife a rise of 5.7%. The only area to experience a fall in the proportion of households in full-time work was Grampian, down from 37.2% last year to 35.8% this year – a fall of 1.4%.
- The only areas where a rise/fall in the proportion of full-time working households was **not** paralleled by a fall/rise in the proportion of unemployed households, were Lanarkshire and North Clyde. Both these areas saw a rise both in the number of full-time working **and** unemployed households.

1.3 **What ethnic groups were housed?**

(see Table 1.3)

- There was an increase in lets to ethnic minorities of 0.6% this year, up to 2.8% from 2.2%. This continues the increase experienced between 1999-00, and means the proportion of lets going to ethnic minorities is almost equal to that when ethnic origin began to be recorded in 1995-6, when the proportion was 3%.
- There was considerable deviation from the national figure across Scottish Homes Areas. The highest proportion of lets to ethnic minorities was in the Forth Valley area (4.3%), with the lowest proportion being in Ayrshire, Dumfries & Galloway (0.2%). Fife, the Highlands & Islands and North Clyde also recorded less than 1% of lets going to ethnic minorities.

1.4 **What were the tenants' previous living circumstances?**

(see Table 1.4)

- The proportion of tenants housed from each category has changed little since last year. The biggest change has been the fall in the proportion of tenants in the 'Immediate Family' category. This was a fall of only 0.7% - down from 19% last year to 18.3% this year.
- Some significant geographical disparities and changes were evident, however. Lanarkshire continues to house a much higher proportion of Council tenants than the national average at 24.8%, but this considerably less than the 28.2% of 1999-2000. The proportion of lets made to existing tenants varied from only 9.4% in Ayrshire, Dumfries & Galloway, to 24.5% in Glasgow City.

- Likewise, the proportion of lets to those previously housed by friends or relatives was only 7.8% in The Borders, but 26.3% in Fife. Interestingly, the other 10 Scottish Homes Areas returned results that were broadly in line with the national average of 15.4%.

1.5 **Why were tenants rehoused?**

(see Table 1.5)

- The three most common reasons given by associations for re-housing households were, as with previous years, overcrowding (16.6%), medical/health reasons (15.2%) and the wish to live independently (12.3%). The significance of these reasons varied considerably by household type.
- Within individual household types, other reasons were also of great significance. For instance, personal and social support was cited as a reason for re-housing 24.6% of single older tenants and 20.5% of older couples. Single adults (12.2%), adult couples (10.4%) and lone parents (10.2%) were most likely to have been rehoused due to living in temporary accommodation.

1.6 **How many tenants had been homeless?**

(see Table 1.6)

- The number of statutorily and non-statutorily homeless households being housed increased slightly from 1999-2000, up to 43.1% from 42.8%.
- Changes in homelessness status by household type were small. The greatest increase in statutorily homeless households was in single older people, where the proportion had increased by 1.6%, from 3.3% in 1999-2000 to 4.9% in 2000-2001. The greatest decreases in the proportion of statutorily homeless households were among lone parents (down 1.9%) and households with 3 or more adults and children (down 2.2%).

1.7 **Who nominated/ referred the tenants?**

(see Table 1.7)

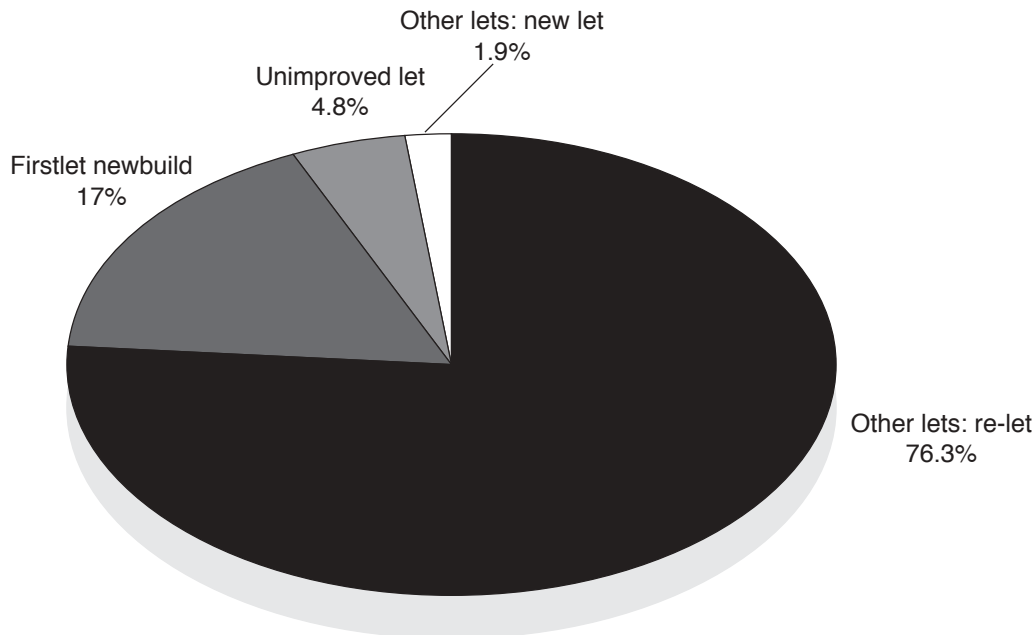

- The nomination/referral proportions (after discounting internal transfers, special referrals and mutual exchanges) remained the same in 2000-2001 as in 1999-2000 and 1998-1999, with 26% of tenants being council-nominated and 70% being direct applicants.
- The Borders area continues to house a much lower proportion of council nominees than other areas. In 2000-2001 only 7.1% of lets were made to council nominees, down from 7.8% the previous year. By contrast, Highlands & Islands area saw a 6.5% rise in council nominees housed - from 28.3% in 1999-2000 to 34.8% this year - making it the area with the highest proportion of council nominees.

2. Buildings and Letting Types

2.1 What types of let were made?

(See Table 2.1)

- The proportion of unimproved properties fell from 6.5% last year to 4.8% this year.
- The overall proportion of new-build properties, let for the first time, remained roughly the same as last year (up 1% to 17%). Geographically, however, there was significant change in the proportion of lets made of this type. In Ayrshire, Dumfries & Galloway the proportion rose to 23% from 11.9% in 1999-2000. By contrast, Fife saw the proportion drop from 20.9% in 1999-2000 to 12.2%. Other areas saw similar rises/falls.

2.2 What types of dwelling were let?

(see Table 2.2)

- The percentage of flats (including bedsits) let in 2000-2001 fell to 75.0% from 75.7% in 1999-2000, continuing the fall from the 1998-99 level of 76.3%.
- Across the Scottish Homes Areas, Tayside saw the greatest drop in the proportion of flats being let, down from 79.2% to 71.5%. Despite this overall trend, some Areas saw considerable increases in lettings of flats: Grampian saw an increase of just over 10%, from 68.2% in 1999-2000 to 78.3% in 2000-2001.

- Flats and houses continue to be the only significant forms of dwelling being let across most Scottish Homes areas. However, as with last year, Tayside had a reasonable proportion of lets to bedsits (7%).

2.3 What type of design were the dwellings?

(see Table 2.3)

- The proportion of general needs lets rose to 78.4% from 77.5% last year. This continues the rising trend of the last few years. The proportion of both amenity and sheltered/warden lets fell as compared to last year.
- The Borders area has the highest proportion of amenity lets (15.8%), as with last year. Glasgow City and Tayside have the lowest proportions, at 2.9% and 3.3% respectively. Glasgow City also has the lowest proportion of sheltered/warden lets (6.6%) whereas Tayside has the second highest proportion of such lets at 20%. This serves to emphasise the wide variation in dwelling design between the Scottish Homes Areas.

2.4 What type of tenancies were let?

(see Table 2.4)

- The proportion of 'fair rent' tenancies continued its long-term decline, falling to 1.8% this year from 2.1% last year.

3. Rents, Income and Affordability

3.1 Rents by area and household type

(see Table 3.1)

- The median net weekly rent for all lets rose by 4.7% this year, up from £37.02 in 1999-2000 to £38.75 to 2000-2001. This was a larger rise than the 4.2% of last year.
- Over the Scottish Homes Areas, Lanarkshire experienced the largest rise of 8.8%. This is in direct contrast to 1999-2000, when Lanarkshire experienced the smallest rise in rents.
- Unlike last year, when rents increased over all of the 12 Scottish Homes Areas, the median net weekly rent in Tayside actually fell by 0.4% from £38.16 to £38.01.

3.2 Rents by tenancy type

(see Table 3.2)

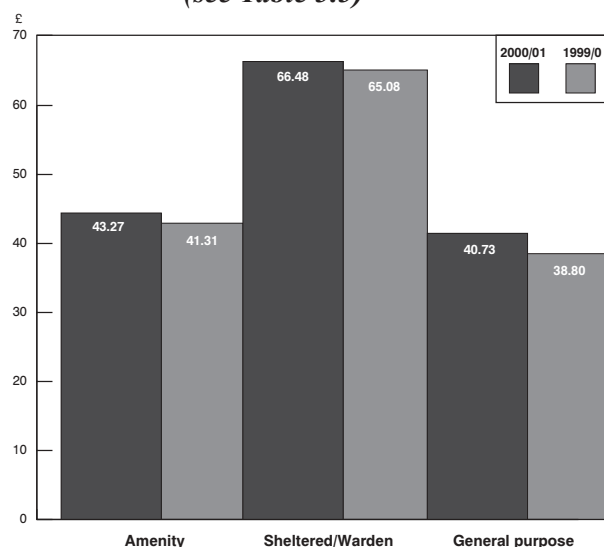

- Fair rents, which had remained roughly static in 1999-2000 over 1998-1999 levels, rose this year by 7.2%, resuming the long-term trend in rising rent levels. Assured rents rose less sharply at 4.7%, slightly more than they rose in 1999-2000 (4.2%).
- Since 1992-1993, fair rents have increased by 68%, whilst assured rents have risen by a total of 49%.

Median Rent (£) by Tenancy Type

3.3 Housing costs by design type

(see Table 3.3)

- Combined rent and service charge levels for general needs housing rose by 5% this year, a similar rise to the 4.5% of last year. For amenity housing, housing costs rose by 4.7% (2.1% last year), and for sheltered housing, costs rose by 2.2% (6% last year).
- Housing costs for general needs housing are 61% of the costs for sheltered housing, and 94% of the costs for amenity housing, almost exactly the same as they were in 1999-2000 (60% and 94% respectively).
- Amenity housing costs were highest in Edinburgh & Lothians at £45.50, and lowest in Glasgow City at £37.20, where they had dropped from their 1999-2000 level of £40.31. By contrast, Ayrshire, Dumfries & Galloway saw amenity housing costs rise by 16% this year.

3.4 Income by area and household type

(see Table 3.4)

- Median weekly incomes rose by 5.4% this year, a larger rise than this year's 4.7% rent increase. However, it should be borne in mind that in 1999-2000 weekly incomes remained static whilst rents rose by 4.2%. Since 1998-1999 therefore, rents have risen by 9% but incomes have risen by only 5.4%.
- Glasgow City once again has the lowest median incomes at £98.55, up from £96.00 last year. Also as with last year, the Highlands & Islands has the highest median incomes at £150.00. This means that for the last two recording periods the Highlands and Islands area has seen an annual increase in income of £10.00; median weekly income having been £140.00 in 1999-2000 and £130.00 in 1998-1999.
- All the areas that experienced falling incomes during 1999-2000 have reversed this trend and recovered incomes higher than were experienced in 1998-1999. For instance, in 1998-1999, North Clyde had a median weekly income of £116.05, which fell to £109.00 last year, and recovered to £120.45 this year.

3.5 **Housing Benefit eligibility (all households)**

(see Table 3.5)

- The proportion of households on full HB has risen from 52% in 1999-2000 to just over 55% this year, while the proportion of households on partial HB rose from 13.5% to 16.4%.
- Glasgow City, as with previous years, had the highest proportion of households in receipt of HB at 80.4%. This was also a significant increase on the 73.7% recorded last year. Tayside and North Clyde have experienced the largest increases in HB dependency, from 59.9% to 74% and from 60.7% to 72.1% respectively.
- By contrast, The Borders, Forth Valley, Grampian, and Highlands & Islands areas all had HB receipt rates below 60%. However, each of these areas has also seen an increase in HB receipt rates from last year.

3.6 **Housing Benefit eligibility (working households)**

(see Table 3.6)

- The proportion of working households receiving HB has risen since 1999-2000, from 21% to 24.7%. However, this has been due to a rise in the number of households on partial HB, as there were only 6.3% of working households on full HB in 2000-2001, as compared to 6.5% last year.
- Among different household types, the general pattern of HB receipt is similar to last year. However, there are been a significant shift among older couples from partial to full HB, although the total proportion receiving any HB is roughly the same (72.7% in 2000-2001, and 73.7% in 1999-2000). Mixed adult/older person households have also seen a significant change in circumstances, with only 16.6% in receipt of HB in 1999-2000, but 44.4% in receipt of HB in 2000-2001.

3.7 | **Affordability - combining the SFHA's affordability tests**
(see Tables 3.7 and 3.8)

All working households

Rent as a Proportion of Income	Income remaining after paying the rent		TOTAL (percentage and number)
	less than 140% of Income Support	140% or more of Income Support	
25% or less	12.2 % 420	64.3 % 2216	76.4 % 2636
more than 25%	10.8 % 371	12.8 % 442	23.6 % 813
TOTAL (percentage and number)	22.9 % 791	77.1 % 2658	100.0 % 3449

- 35.7% of rents (100% minus 64.3%) for working households failed at least one of the SFHA's two affordability tests. This is less than the 36.2% failure rate of 1999-2000, but still higher than the 33% of 1998-1999.

Working households not on Housing Benefit

Rent as a Proportion of Income	Income remaining after paying the rent		TOTAL (percentage and number)
	less than 140% of Income Support	140% or more of Income Support	
25% or less	5.6 % 145	81.0 % 2109	86.6 % 2254
more than 25%	0.3 % 9	13.1 % 341	13.4 % 350
TOTAL (percentage and number)	5.9 % 154	94.1 % 2450	100.0 % 2604

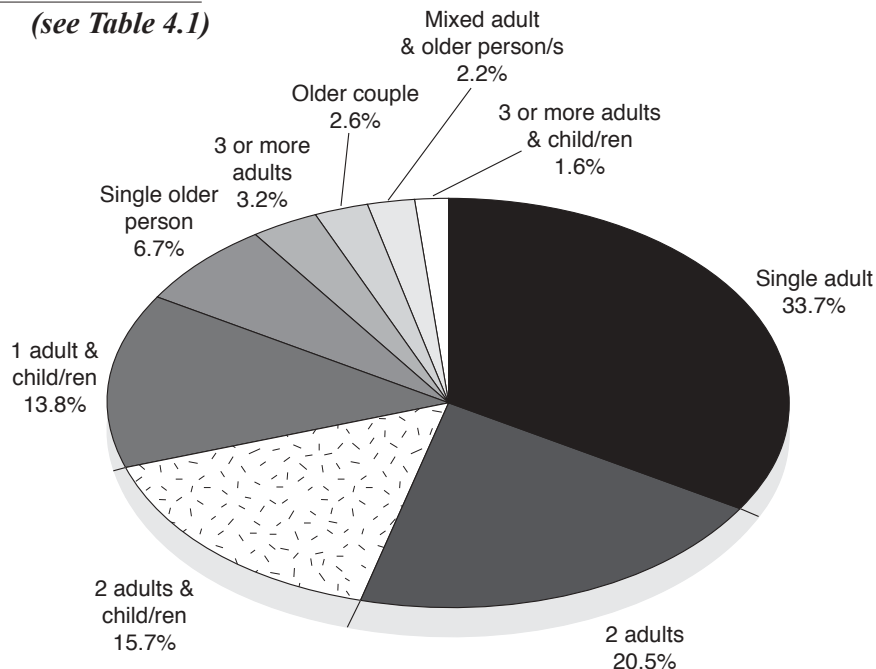

- 19% of rents (100% minus 81%) for working households not on HB failed at least one of the SFHA's two affordability tests. This is less than the 22% failure rate of 1999-2000, but still higher than the 15.9% of 1998-1999.

4. Shared Ownership Sales

The following information is based on records for 329 shared ownership sales by housing associations in 2000-2001, of which 63% were new sales and 37% re-sales.

4.1 Who was housed?

(see Table 4.1)

- The proportion of sales to lone parents rose again this year, from 11% to almost 14%. In 1998-1999 this proportion was only 8.5%. Sales to couples without children fell this year by 4.5%, from 25% in 1999-2000 to 20.5% this year.

4.2 Who was working?

(see Table 4.2)

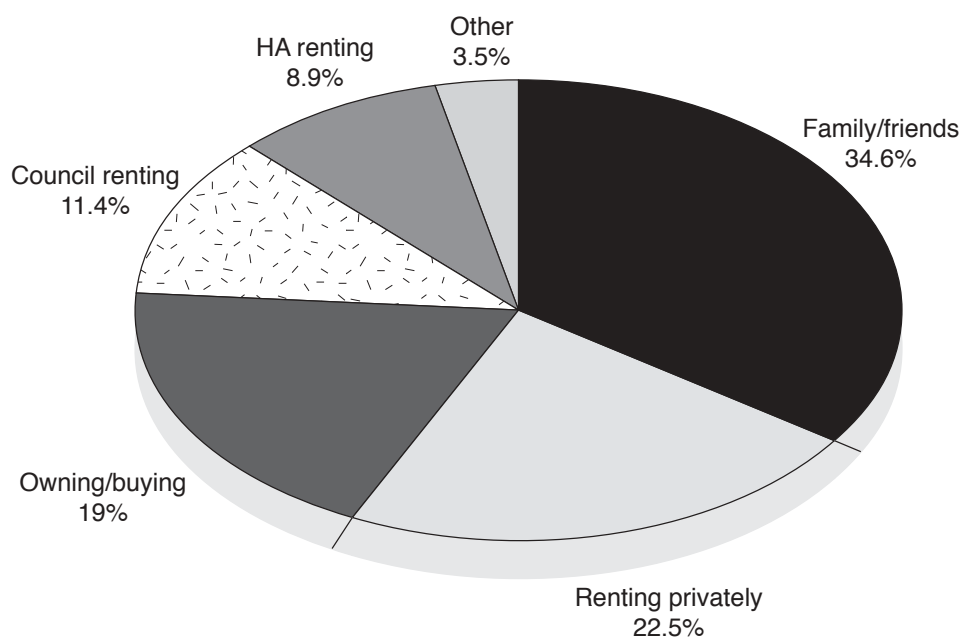

- The proportion of those housed who were in full-time work remains unchanged since last year at 77.6%. However, the proportion of unemployed households rose from 1.5% in 1999-2000 to almost 4% this year.

4.3 What ethnic groups were housed?

- The ethnic question was answered by 299 of the 329 purchasers. Of these, only 1 sale was made to a non-white household.

4.4 What were the purchasers' previous living circumstances?

(see Table 4.4)

- The proportion of households moving from owner-occupation bucked the trend of the last few years by rising 6% to 19%. In 1999-2000 this figure was 13%, and in 1998-1999 it was 16%. Corresponding falls in the proportion of households moving from other sectors was seen, such as amongst those who had been living with family or friends. This sector accounted for 37% of purchasers in 1999-2000 but only 35% this year.

4.5 Why did households make a shared ownership purchase?

- The three most common reasons for purchasers choosing to undertake shared ownership continue to be “more affordable” (19.2%), “setting up first home” (23%) and “more suitable property” (15.5%). However, the importance of each of these reasons has changed considerably since 1999-2000, when the figures read 29%, 21% and 11.5% respectively.

4.6 **Were purchasers previously on a waiting list for rented housing?**

- Since last year, there has been considerable change in the proportion of purchasers on neither a Housing Association or Council waiting list. In 1999-2000, only 16.5% of purchasers were from such circumstances, but in 2000-2001 this was 29%. This rise is paralleled by a fall in the proportion of purchasers on both lists (from 24% to 19%) and of those on only a housing association list (30.5% to 27%).

4.7 **How did purchasers hear about shared ownership?**

- The importance of housing association staff as a source of information to purchasers fell this year to 32.3% from 38.5%. Leaflets recovered their importance however, being a source of information to almost 14% of purchasers this year. This compares to 7% last year and 13% in 1998-1999.
- The importance of signboards fell 5% from 13% to 8%. Family and friends, newspapers and estate agents all marginally increased their importance.

4.8 How many purchasers were first-time buyers?

- In 2000-2001, just over 31% of purchasers had been home owners at some point in the past, compared to 30% last year.

4.9 How many purchasers needed a mortgage?

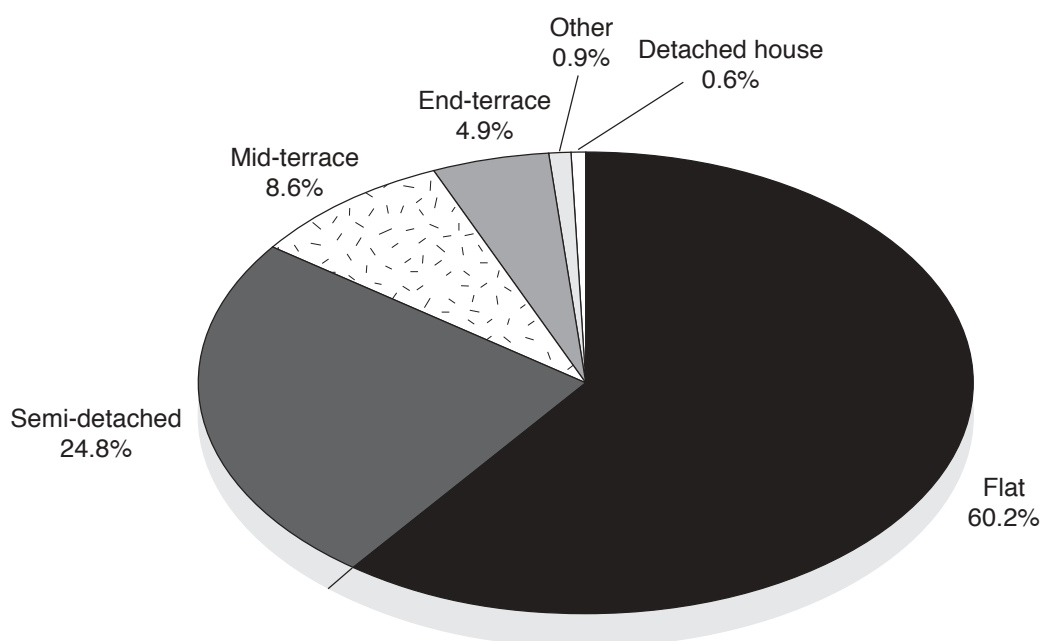

- Only 72.5% of purchasers needed a mortgage in 2000-2001, down from the 75% of last year. Almost one-fifth of purchasers relied on their own funds to make purchases.

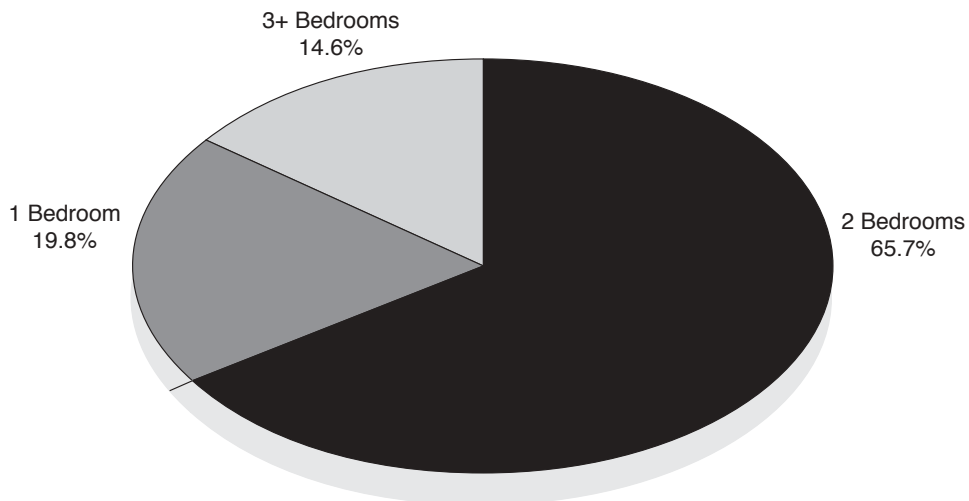

4.10 What sizes of tranche were bought?

(see Table 4.10)

- The proportion of purchasers buying a 75% tranche continues to fall, and stood at 5.3% this year, down from 7% last year. Those buying a 50% tranche fell from 36% to 34%, leaving 60.7% of purchasers buying a 25% tranche.

4.11 What types and sizes of property were bought?

- In 1999-2000, 46% of properties bought were flats. This year, just over 59% of properties bought were flats, an increase of 14%. There was a corresponding fall in the proportion of all types of houses bought: semi-detached properties fell from 31 to 25%, mid-terrace houses from 12% to 9% and end-terrace houses from 10% to 5%.
- In line with this change, the proportion of one-bedroom properties rose from 16% to 20%, and the proportion of three bedroom properties fell from 19% to 15%.

4.12 | What was the market value of the properties bought?

- The highest percentage of properties sold was in the £35,000 to £44,000 price bracket, contrasting to last year when most properties were in the £45,000 to £54,000 price bracket. More properties were sold in the lowest and highest brackets than last year (up 2.1% for properties worth under £35,000 and up 4.3% for properties above £65,000).

4.13 **Incomes of purchasers**

(see Table 4.5)

- The median income of purchasers this year returned to the £230.00 that was also seen in 1998-1999, down from the £250.00 of last year.

4.14 **Rents by Area and Tranche (25% and 50% purchasers)**

	25% tranche	50% tranche
Ayrshire Dumfries & Galloway	16.73	22.88
Borders	34.60	20.83
Edinburgh & Lothians	26.85	19.38
Fife	27.30	23.15
Forth Valley	24.35	17.44
Glasgow City	35.05	23.97
Grampian	27.90	20.08
Highlands & Islands	28.15	18.99
Lanarkshire	28.77	20.06
North Clyde	24.54	16.38
South Clyde	24.97	16.65
Tayside	27.09	17.66
Scotland	26.80	19.34

4.15 **Total weekly housing costs (for people paying rent and mortgage)**

Ayrshire Dumfries & Galloway	£28.28
Borders	56.56
Edinburgh & Lothians	36.51
Fife	61.04
Forth Valley	47.91
Glasgow City	60.52
Grampian	59.84
Highlands & Islands	50.09
Lanarkshire	22.48
North Clyde	40.95
South Clyde	45.63
Tayside	39.54
Scotland	48.05

4.16 | How long were properties vacant?

The number of weeks properties were lying vacant was as follows:

	Frequency	Valid Percent
Not applicable	194	60.63
Under 10 weeks	21	6.56
10 - 19 weeks	72	22.50
20 - 29 week	19	5.94
30 weeks and over	14	4.38
Total	320	100.00

- There has been a significant shift in the patterns of vacancies since last year. In 1999-2000, a combined total of 79% of properties had been vacant for less than 10 weeks, and a further 10% had been vacant for between 10 and 19 weeks. This year, however, only 67% of properties had been vacant for less than 10 weeks, and 23% had been vacant for between 10 and 19 weeks.

4.17 | Shared Ownership sales by Area

The 329 shared ownership sales recorded by SCORE were distributed as follows:

	Frequency	Valid Percent
Ayrshire Dumfries & Galloway	26	7.90
Borders	3	0.91
Edinburgh & Lothians	24	7.29
Fife	5	1.52
Forth Valley	50	15.20
Glasgow City	24	7.29
Grampian	14	4.26
Highlands & Islands	56	17.02
Lanarkshire	17	5.17
North Clyde	7	2.13
South Clyde	20	6.08
Tayside	83	25.23
Total	329	100.00

5. Tables

TABLE 1.1 Household Type by Area*

	Ayrshire Dumfries & Galloway	Borders	Edinburgh & Lothians	Fife	Forth Valley	Glasgow City	Grampian	Highlands & Islands	Lanark- shire	North Clyde	South Clyde	Tayside	TOTAL
	%	%	%	%	%	%	%	%	%	%	%	%	%

SCORE

Subscription to SCORE covers the Annual Digest, a mid-year report and special feature report. For details contact Pat Boyle at SFHA on 0131 556 5777

The SCORE Log is a double-sided A4 document which records information under 16 separate headings. A full manual giving complete instructions is available, free to SFHA members, £5 to others

The SCORE database is maintained and analysed by the
Joint Centre for Scottish Housing Research
(University of Dundee / University of St. Andrews)
Based at the School of Town & Regional Planning
University of Dundee, 13 Perth Road
Dundee DD1 4HT
Tel: 01382 345326

Printed & Designed by Reprographic Services
University of St. Andrews
Purdie Building, North Haugh
St. Andrews, Fife, KY16 9ST
Tel: 01334 463020

Scottish Federation of Housing Associations
38 York Place
